WALK OFF MATS®

**We start with
Millitron®
dye-injection
technology!**

Patented Millitron® dye-injection technology is entirely computer controlled with micro-jets that inject dye deep into the carpet pile, unlike screen printing which just adds color to the tips of the fibers.

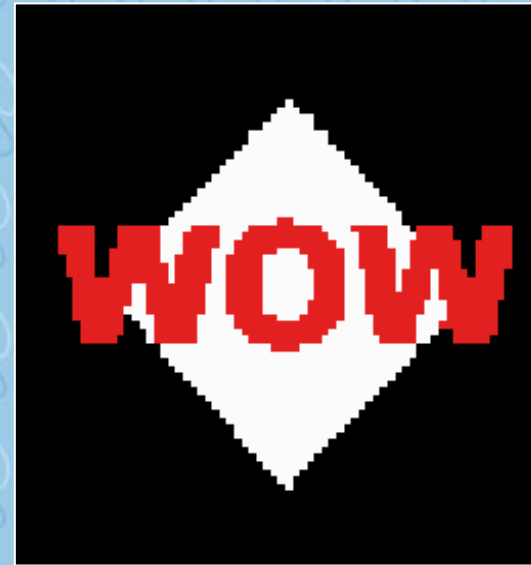

The Millitron®
technology enables our
designers to create
designs at
20th gauge
design resolution which
equals an amazing
400 dots per square inch
of design clarity!

20th gauge
400 DPI

On average, tufted logo
mat technologies
provide
8th gauge
design at only
64 dots per square inch
of design clarity.

20th gauge
400 DPI

**How important is
design clarity to you?**

**How important is
design clarity to your
customer?**

**Which design would
you rather have?**
